

AYUSH JHA

PRODUCT DESIGNER • FRONTEND DEVELOPER

📞 7400067778 @ ayushjha-eta.vercel.app 🔗 LinkedIn/in/ayushdebugz 📍 Panvel, India

SUMMARY

Product Designer and Frontend Developer focused on building practical software products. Designed and launched NoirShade and pixDF, publicly available Chrome Extensions developed from concept to deployment. Currently pursuing MCA at IIT Patna.

EXPERIENCE

04/2025 - Present

Remote

Founder & Developer

Amatyapath Solutions

- Delivered end-to-end digital solutions spanning UI/UX design, frontend development, deployment, and maintenance for private clients across web and product-focused engagements.
- Operating an MSME-registered sole-proprietorship to undertake commercial and government-sector digital transformation projects by 2027.

12/2024 - 02/2025

Pune, India

Associate UI-UX Designer

Codec Technologies

- Built the user experience and interface architecture for an e-commerce platform, producing wireframes, user flows, prototypes, and high-fidelity screens aligned with business and user requirements.
- Conducted & contributed to design research and case-study-driven design exploration to refine navigation clarity, product discovery, and overall shopping experience.

04/2024 - 07/2024

Pune, India

Junior Frontend Developer

EasyShiksha

- Contributed to the deployment and frontend implementation of an AI-powered task management application, focusing on responsive layouts, usability, and production readiness.
- Maintained and enhanced application interfaces through frontend optimization, bug resolution, and feature integration using modern web development practices.

EDUCATION

2025 - 2027

Patna, India

Master of Computer Applications

Indian Institute of Information Technology, Ranchi (Academic Collaboration with I.I.T Patna)

2021 - 2024

Pune, India

Bachelor of Computer Applications

MIT World Peace University

FEATURED PROJECTS

</> NoirShade [Dark-Mode Extension]

Built a Chrome Extension with **200 installs**, **79 active users**, **5.0 rating**, and **6 reviews**.
Developed site-specific dark mode behavior using CSS injection and DOM manipulation, avoiding traditional color inversion while preserving readability.
Listed & Deployed On Web Store: 14 November 2024

</> pixDF [Jpg2Pdf Converter]

Conceptualized and built a browser-based image-to-PDF utility tool with drag-and-drop workflows and client-side PDF generation. Batch convert up to 25 images at a time.
Generates PDFs from up to 15 high-quality images in under 10 seconds without external processing or image compression.
Listed & Deployed On Web Store: 9th February 2025

TECH STACK

Adobe XD	Bootstrap	Chrome APIs	CSS3	CSS Injection	DOM Manipulation	FigJam	Figma	
Framer Motion	Git	GitHub	HTML5	JavaScript (ES6)	Local Storage APIs	Magic UI	Manifest V3	Next.js
Node.js	PDF-Lib	Python	React	Tailwind CSS	TypeScript	Vercel
